

ASSIGNMENT II: Process Mapping and Improvement

Due date: 16 March, 2026

Total Marks: 30 (5% of the final evaluation)

Assignment submission protocol:

- i- Word document (save your drawing as a picture to be pasted on the document)
- ii- The page should bear your full names; font Calibri bold, size 12
- iii- Mention the process you are depicting with a heading; font Calibri bold, size 14, uppercase
- iv- Font size for part 2 of the assignment mentioned below should be 11, Calibri
- v- Page size A4; at least 0.5 margins on all sides
- vi- Once finished, the file should be saved by your name/names followed by initial for surname e.g., Iqbal.M &Amna.N &Tauseef.Q

Assignment Scope

For this assignment, you can work in groups of maximum three. To begin with, select **ONE** of the following two types of processes for possible improvement:

- A process that is part of the business/project/requirement identified in your previous assignment (i.e., Assignment I) e.g., a recruitment process
- A process put in place by the University that is part of your academic life e.g., process for selection of optional courses

1. Using a flowchart tool such as io-draw, depict the process AS-IS (10 marks)
2. Using bullet points, highlight the issues with the process (10 marks)
3. Finally, draw another flowchart to depict the TO-BE flow (10 marks)

To appreciate the importance of the activity from a Quality Management perspective, you may want to consult ISO (QMS) available at

<https://www.iso.org/obp/ui/en/#iso:std:iso:9001:ed-5:v1:en>

Notes:

- The TO-BE flow should be in line with the overall objective, approach, or philosophy of the selected business / University. For example, with the exam process that we discussed in the class, allowing students who have not cleared dues to take the exam should be built in the TO-BE diagram
- Please remember that the flowchart should be visually appealing and concise, and aim at clarifying both the AS-IS and TO-BE processes to stakeholders such as business managers, administrators, students
- Please also remember that whereas you are looking at only a single process, when organizations apply for ISO 9001 certification, development of manuals, policies and documentation of several processes may be required to evaluate whether an organization's Quality Management Systems meet international standards specified by ISO.
