

BUSINESS ANALYSIS

Business Data and Data Visualization

1

BUSINESS DATA

- **What is business data?**

“Business data is the collective information related to a company and its operations. This can include any statistical information, raw analytical data, customer feedback data, sales numbers and other sets of information.”

- **Why maintain business data**

- Helps businesses make decisions
- Improves customer satisfaction
- Increases revenue and profits
- Helps with problem-solving
- Improves company processes

2

TYPES OF BUSINESS DATA

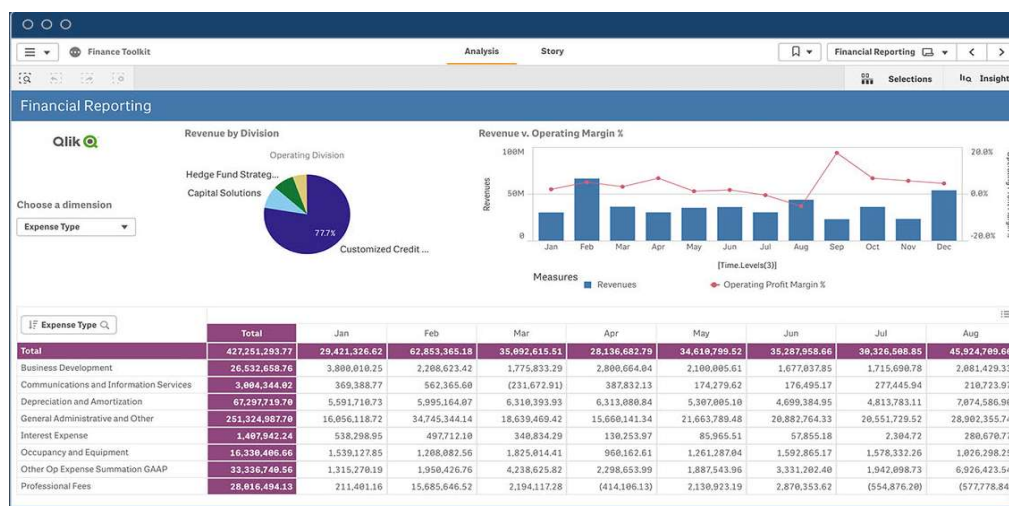

- **Financial data** – Includes financial information, such as income, expenses, assets, and liabilities.
- **Customer data** – Information that a business collects from consumers/clients/customers such as data on customer engagement with company contact, customer purchases or personal customer data for the company database
- **Analytics data** – Information that a company collects for analytical purposes, such as web traffic analytics
- **Inventory and supply chain data** - Information on inventory and supply chains to ensure correct inventory counts, efficient supply chains and a continuous flow of goods and materials to keep production moving
- **Product data** – information that a company collects about its own products. This can include sales numbers, popularity, efficacy of its products or cost to manufacture
- **Marketing data** – Information a company collects for marketing purposes or about its marketing processes. Marketing data can include customer or website analytics, market research data, competitor research data or advertisement analytics
- **Employee data**– Data on employees' performance and participation in the workplace. Companies can also track employee sales or behavior to learn more about the work environment and company morale

INTRODUCTION TO FINANCIAL STATEMENTS

- **General purpose financial statements:** Includes financial information, such as income, expenses, assets, and liabilities.
 - Are based on applicable accounting standards for financial reporting and are intended to be communicated to a wide range of users
 - Are prepared on a quarterly or annual basis
 - Are used by managers in making strategic decisions towards the long-term objectives of the company
- **Managerial reports:** may be prepared to meet information needs of management for internal decision making.
 - Are only distributed within the company and
 - Are not required to comply with any accounting standards or principles

5

INTRODUCTION TO FINANCIAL STATEMENTS

1. "To **communicate important financial information** about the financial position, financial performance and cash flows of an entity that is useful to a wide range of users in making economic decisions. They tell the financial condition of a company and how well it is performing over a specific period of time in terms of profit.
2. To **provide information about different financial statement elements** such as the company's assets, liabilities, equity, revenues, expenses, gains, losses, owner investments, owner withdrawals, dividends, and cash flows.
3. To assist users in **predicting the entity's future cash flows** and, in particular, their timing and certainty.
4. To **show the results of management stewardship** and accountability over the resources of the entity. This helps owners and investors assess how effective management is in fulfilling the role entrusted to them.
5. **Fulfil the financial reporting requirements** of government agencies."
