

Assignment 1

White-Box Testing in Practice

Question

Think about the professional role you see yourself in — this can be any role in the software industry (e.g., backend developer, mobile app developer, DevOps engineer, QA engineer, etc.).

1. Describe the role and your core responsibilities in it.
2. Explain how white-box testing techniques would be relevant and useful in that role.
3. Come up with a specific scenario from that role where you would apply white-box testing. Explain how you would apply the white-box testing techniques — and how they would help you.

Submission

Submit a report (1–2 pages, PDF or Word) covering all three parts above.

Note: *Name your file with your Roll Number*
