

Quiz 2

Lab-Programming Fundamentals

Check if two arrays can be made equal by swapping pairs of one array:

Input: $\text{arr1}[] = \{0, 0, 1, 1\}$, $\text{arr2}[] = \{1, 1, 0, 0\}$

Output: Yes

Explanation:

Swap $\text{arr1}[1]$ and $\text{arr1}[3]$, it becomes $\text{arr1}[] = \{0, 1, 1, 0\}$.

Swap $\text{arr1}[0]$ and $\text{arr1}[2]$, it becomes $\text{arr1}[] = \{1, 1, 0, 0\}$.

Input: $\text{arr1}[] = \{1, 0, 1, 0, 1\}$, $\text{arr2}[] = \{0, 1, 0, 0, 1\}$

Output: No
